SECTION 3: HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

White to off-white pellets with no odor. May cause moderate to severe eye irritation with corneal injury. Prolonged or repeated skin contact may cause irritation or burns. Inhalation of dust may cause respiratory irritation.

POTENTIAL HEALTH EFFECTS:

ACUTE HAZARDS:

INHALATION: Vapors are unlikely due to physical properties. Dust may cause irritation of the upper respiratory tract.

SKIN CONTACT: A single skin exposure is not likely to cause significant skin irritation. Prolonged or repeated exposure may cause skin irritation and possibly a burn. May cause more severe response if skin is damp and/or abraded, or if material is confined on the skin. When dissolving, the heat produced may cause more intense skin effects as well as thermal burns.

EYE CONTACT: May cause moderate to severe eye irritation with superficial injury which may be slow to heal. When dissolving, the heat produced may cause more intense effects as well as thermal burns.

INGESTION: Ingestion may cause irritation, ulceration and possible hemorrhage of the gastrointestinal tract. May produce acidosis if a substantial amount has been ingested.

CHRONIC EFFECTS: Prolonged or repeated skin exposure may cause skin irritation or possibly a burn.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Because of its irritating properties, this product may aggravate an existing skin condition.

CARCINOGEN: None of the components of these products is listed as a carcinogen or suspected carcinogen by IARC, NTP or OSHA.

SECTION 4: FIRST AID MEASURES

INHALATION: If symptoms occur, remove to fresh air. Consult a physician if symptoms persist.

SKIN CONTACT: Remove contaminated clothing and shoes. Wash all affected and exposed areas with soap and water. Get medical attention if symptoms persists.

EYE CONTACT: Immediately flush eyes with copious amounts of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation, pain, or swelling develops, seek immediate medical attention.

INGESTION: If swallowed, immediately dilute with one to two glasses of water. Get immediate medical assistance by calling a local poison control center, emergency room or physician. Never give anything by mouth to or induce vomiting in an unconscious or drowsy person.

NOTES TO PHYSICIAN: There is no specific antidote. Treatment should be directed at the control of symptoms and the clinical condition. Dilution is a primary consideration. Systemic symptoms are unlikely. Contact your Poison Control Center for specific consultation. If burn is present, treat as any thermal burn, after decontamination.
